

REMARKS

With the claimed relationship of matching resistances, the power dissipation of the resistors may be reduced. Thus, the benefits of matching resistors may be achieved without incurring severe power consumption. Since the cited references show no such thing, the application should now be in condition for allowance.

Support for the added limitation may be found at page 5, line 17, to page 6, line 1.

Respectfully submitted,

Date: March 30, 2006
